ANGSHURPITA GANGULY

Kolkata, India | Ph. no: +91 8172068803 | Email: angshuganguly777@gmail.com | LinkedIn | Portfolio

Analytical B.Tech IT undergraduate with a strong foundation in financial analysis, valuation, financial modelling, and business strategy. Skilled in advanced Excel, quantitative problem-solving, and data-driven decision-making, with an interdisciplinary interest in investment banking, equity research, corporate finance, M&A, deals, assurance, risk advisory, wealth management, and financial consulting.

EDUCATION

GOVERNMENT COLLEGE OF ENGINEERING AND CERAMIC TECHNOLOGY

[Aug 2024 - June 2028] | Kolkata, India

Bachelors in Technology, Information Technology

CGPA: 9.72/10

PROJECTS & EXPERIENCES

LBO Analysis – AES Corporation | NYSE: AES | Aug 2026 | (File Link)

- Built a 5-year LBO model covering operating projections, Sources & Uses, debt schedules, cash sweep and sponsor returns.
- Structured ~$8.6B of debt and $8.0B sponsor equity at a ~$39.1B entry EV; analysed entry/exit multiples and leverage.
- Generated 1.58x MOIC and ~9.6% IRR in the base case, with sensitivity analysis across entry price, exit multiple and holding period.

M&A / Merger Analysis – PFC & REC | NSE: PFC, RECLTD | Aug 2026 | (File Link)

- Built a buy-side merger model covering valuation, trading comps, precedent transactions and accretion/dilution.
- Modelled an all-stock transaction with ~₹41,135 Cr consideration, an 88:100 exchange ratio and ~₹554 Cr estimated synergies.
- Assessed EPS impact, synergy assumptions and integration costs, including an EPS-neutral exchange ratio of ~0.81x.

Financial Analysis – Tata Motors Passenger Vehicles | NSE: TMPV | Aug 2026 | (File Link)

- Built an integrated 5-year three-statement model covering revenue, margins, working capital, capex, debt and cash flow.
- Forecast revenue growth from ~₹3.36T to ~₹4.36T and earnings recovery through FY2031.
- Tested operating and cash-flow sensitivities, focusing on capex, inventory, debt repayment and liquidity.

DCF Valuation – Infosys | NSE: INFY | Aug 2026 | (File Link)

- Built a 5-year DCF model with WACC, terminal value, unlevered FCF and sensitivity analysis.
- Estimated DCF equity value of ~₹337,697 Cr, implying ~25% downside to the market price.
- Cross-checked valuation against trading comps and analysed the key drivers behind the DCF–comps valuation gap.

LEADERSHIP & EXPERIENCES

NERV-VIPER | Founder & Lead Developer | 2026 – Present

- Founded and scaled an AI-driven security orchestration framework, overseeing the end-to-end product architecture, strategic roadmap, and subscription infrastructure.
- Spearheaded commercialization and growth efforts, demonstrating strong entrepreneurial and risk management skills by successfully bootstrapping the platform to 15+ active users and converting 10+ paying customers.

SIH Hackathon | Team Lead (Team Redox)

- Led a technical team to prototype a solution under high-pressure constraints, achieving 3rd place in a competitive campus-wide hackathon.
- Managed the full project sprint from conceptualization to final technical presentation, focusing on scalability and implementation.

SKILLS & INTERESTS

- **Technical Skills:** Financial modelling (three-statement, DCF, M&A, LBO fundamentals); valuation and sensitivity analysis; advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP); PowerPoint; Python & Libraries; JAVA; SQL; data analysis; data cleaning
- **Certification:** J.P. Morgan Investment Banking Job Simulation (Forage); McKinsey Forward Program (2026)
- **Strategy:** Market analysis, growth strategy, business model evaluation
- **Market Intelligence:** Industry research, trend analysis, data interpretation
- **Automation:** AI-assisted Financial Modelling & Research: ChatGPT, Claude
- **Languages:** English (Fluent), Hindi (Fluent), Bengali (Native)
- **Interests:** Automotive technology (performance cars & bikes), Formula 1, and community volunteering.
