ANGSHURPITA GANGULY

Kolkata, India +91 8172068803 **angshuganguly777@gmail.com** **LinkedIn** **Portfolio**

Quantitative B.Tech IT undergraduate with institutional expertise in Financial Modelling, M&A Accretion/Dilution, LBO Debt Structuring, and DCF Valuation. Targeted at Investment Banking (Front/Back Office), Private Equity, and Corporate Finance.

EDUCATION

GOVERNMENT COLLEGE OF ENGINEERING AND CERAMIC TECHNOLOGY **Kolkata, India | Aug 2024 – June 2028**

Bachelor of Technology (B.Tech) in Information Technology *Cumulative CGPA: **9.72 / 10.00** (Top 1% of Cohort)*

Relevant Academic Foundations: Financial Accounting & Statement Analysis, Corporate Valuation, Quantitative Economics, Advanced Data Analysis, Relational Databases (SQL), Applied Probability & Statistics.

FINANCIAL MODELING & TRANSACTION PROJECTS

LBO Valuation & Buyout Model – The AES Corporation (NYSE: AES) Model File **Aug 2026**

$17.1B All-Cash Take-Private Transaction & Recourse Debt Structuring | 1.58x MOIC / 9.6% Base Gross IRR *Mega-Cap Utilities / Infrastructure*

- Architected a 5-year leveraged buyout model evaluating an all-cash take-private offer at $15.00/share ($10.7B equity purchase; $39.1B entry EV at 13.6x Adjusted EBITDA) with institutional Sources & Uses engineering.
- Structured an $8.6B 3-tranche recourse debt package (Term Loan B at SOFR+300, 6.25% Senior Secured Notes, 7.25% Senior Notes) alongside an $8.03B sponsor equity cheque, while rolling over $23.9B in asset-level project debt.
- Modeled 100% free cash flow sweeps, tax-equity (HLBV), mandatory debt amortization, and multi-variable return sensitivity tables across exit multiples (11.0x–15.0x EBITDA), entry valuation, and 3–7 year hold periods.

M&A Accretion / Dilution Model – Power Finance Corp & REC Ltd (NSE: PFC, RECLTD) Model File **Aug 2026**

₹41,135 Cr ($5.0B+) Public Minority Amalgamation | 0.88x Swap Ratio & Synergy Underwriting *Sovereign Financials / Power NBFCs*

- Engineered a buy-side merger model evaluating the statutory amalgamation of India's premier power NBFCs (~₹10+ Lakh Cr combined loan assets), modeling PFC acquiring the remaining 47.37% public minority stake in REC.
- Modeled an all-stock transaction issuing 109.77 Cr new shares at an 0.88x swap ratio, projecting pro forma ownership (75.0% legacy PFC retention) and underwriting ₹554 Cr in pre-tax synergies via 10 bps debt spread compression.
- Conducted accretion/dilution analysis showing -1.95% initial dilution, calculated an EPS-neutral exchange ratio of 0.811x, and benchmarked valuation against 6 precedent landmark Indian financial sector all-stock mergers.

Integrated 3-Statement Financial Operating Model – Tata Motors PV (NSE: TMPV) Model File **Aug 2026**

5-Year Operating Projections (IS, BS, CFS), Capex Scheduling & Cash Flow Deleveraging *Automotive / Clean Mobility*

- Constructed a dynamic 5-year three-statement financial model linking revenue builds, production capacity, working capital cycles (DSO, DIO, DPO), debt schedules, and automated circular interest breakers.
- Forecast top-line growth from ₹3.36T to ₹4.36T and earnings recovery through FY2031, modeling segment unit economics across Electric Vehicles (EV) and Internal Combustion Engine (ICE) platforms.
- Stress-tested cash-flow sensitivities focusing on capex intensity, inventory turns, debt service coverage ratio (DSCR), and balance sheet liquidity buffers under severe supply chain and margin headwinds.

DCF Intrinsic Valuation & Peer Comps Analysis – Infosys Ltd (NSE / NYSE: INFY) Model File **Aug 2026**

5-Year Unlevered Free Cash Flow & Relative Valuation | Dislocation & Downside Underwriting *Technology / IT Services*

- Built an institutional 5-year Unlevered DCF model utilizing a WACC of 11.4% and 4.5% perpetual growth rate, deriving an intrinsic equity value of ₹337,697 Cr (₹834.45/share), establishing a ~25.2% downside margin of safety.
- Benchmarked against public trading comps (TCS, HCL Tech, Wipro, LTIMindtree), showing Infosys traded at a 21.9% multiple discount to peer median EBITDA multiples despite posting top-quartile EBITDA margins (23.7%).
- Reconciled the DCF-to-comps valuation spread, identifying macroeconomic discretionary IT budget contractions and GenAI pricing pressure as critical fundamental valuation drivers.

LEADERSHIP & PROFESSIONAL EXPERIENCE

NERV-VIPER **Kolkata, India | 2026 – Present**

Founder & Lead Developer | Venture Execution, Commercialization & Unit Economics *AI & Enterprise Security*

- Founded and architected an AI security orchestration platform, designing multi-tenant subscription infrastructure, product roadmap, and commercial go-to-market strategy.
- Bootstrapped venture from inception to 15+ active institutional users and converted 10+ paying customer accounts, managing revenue collections, customer acquisition cost (CAC), and operational budget allocation.

SMART INDIA HACKATHON (SIH) **Kolkata, India | 2025 – 2026**

Team Lead – Team Redox | High-Pressure Technical Problem Solving & Presentation *Competitive Hackathon*

- Directed a 6-member engineering sprint under 48-hour pressure constraints, winning 3rd place campus-wide across 50+ competing teams for technical architecture and execution feasibility.
- Managed cross-functional deliverables from concept ideation to final executive board presentation, pitching financial viability and deployment scalability to industry evaluators.

TECHNICAL SKILLS, CERTIFICATIONS & INTERESTS

Financial Modeling & Valuation: Three-Statement Financial Modeling, DCF (Unlevered FCF, WACC, Terminal Value), LBO Structuring & Returns Waterfall (MOIC, IRR), M&A Accretion/Dilution Analysis, Trading Comparables (Comps), Precedent Transactions, Sensitivity & Scenario Analysis.

Certifications & Executive Training: J.P. Morgan Investment Banking Job Simulation (Forage: M&A screening, financial analysis, DCF, pitch book); McKinsey & Company Forward Program (Structured Business Problem Solving, Leadership, 2026).

Technical Tools & Quantitative Programming: Advanced Microsoft Excel (Dynamic Financial Models, Pivot Tables, XLOOKUP, Data Tables, Goal Seek), Microsoft PowerPoint (Pitchbook Design), Python (Pandas, NumPy, Matplotlib for financial data), SQL, Java, Data Cleaning.

Languages & Extracurriculars: English (Fluent/Professional), Hindi (Fluent), Bengali (Native) | Automotive Engineering (Performance Cars & Superbikes), Formula 1 Racing Analytics, Community Volunteering.
